

SMTP2GO EMAIL DELIVERY

EMAIL DELIVERY & DEVICE ALERTS

SMTP2GO is the scalable, reliable and versatile way to deliver emails from your devices and software applications.

SET & FORGET

Know your emails are delivered
Every business, needs a reliable and flexible outgoing email service for sending transactional and alert emails from their devices, websites, printers, scanners and software. It's

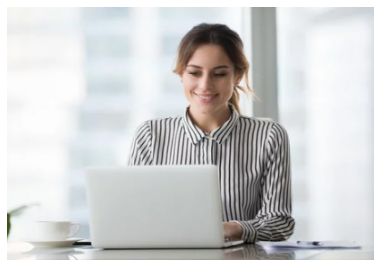

also great for any software that sends alerts and reminders to clients. Devices and software are now easy to setup and send email via SMTP2GO. Forget about trying to get Google or Microsoft to send your specialised device and software transactional emails - they won't! SMTP2GO fills the gap by providing a reliable and robust email delivery service where other providers simply fail. SMTP2GO is easy to configure and simply works.

YOUR EMAIL MATTERS

We understand the importance of your emails, and we want to get them where you need them to go. That's why email reputation and deliverability matters. Your messages don't belong in a spam folder.

SMTP2GO makes email delivery easier by taking care of blacklists and reputation management so your emails are delivered where they can be read every time. We use SMTP2GO to send alert emails from our clients critical equipment so we know of an issue the minute it happens.
