

SECURE ONLINE BACKUPS

**YOUR DATA IS PRECIOUS.
LET US HELP PROTECT IT**

We live in the digital age where all important documents and data are stored electronically. But what happens when disaster strikes?

SAFE & SECURE

PC Pitstop Secure Online Backup
Even though cloud storage has been around for years, many businesses either have no backup in place at all or still use memory sticks or external hard drives to back up their data.

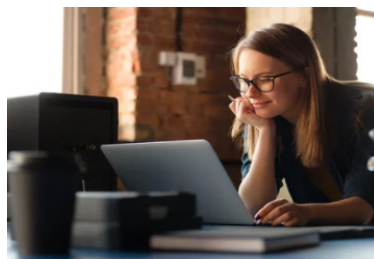

There is a much better solution – one we can help you set up, monitor and manage and without any huge upfront cost. It is called PC Pitstop Secure Online Backup. We have developed a solution that backs up your data automatically to secure online cloud storage. It's easy to use and has powerful features that make your disaster recovery plan simple, secure, reliable, and affordable.

MONITORED BACKUP

We actively monitor and manage your backup account. Whenever you need support, our team can jump into our console, find files, restore file versions, and fix all other issues remotely. This means you get a high level of support but without the cost of having on-site technical support staff or worrying if your data has actually been backed up or not.

Easy to set up - Our team simply installs our backup software onto your devices, and it stores all your important data to the cloud automatically.

Pitstop IT is powered by PC Pitstop, your 7x Port Macquarie Business Awards winning team.
